

fischer light channel system FLS

Easy, stable and variable.

fischer light channel system FLS.

Easy and stable.

Installation channel FLS

The alternating long slots with 8,5 mm and 10,5 mm width in the channel **enable the optimised fixing in the substrate.**

Unique channel width of 31 mm.

The serration with stamped teeth in the channel **facilitates the installation of the connector elements intensively.**

The channel shape with edge seams gives a **perfect fit for the construction elements.**

The wide range of channels with three channel heights (17, 30 and 37 mm) **allows greater flexibility.**

The scale on the channels **simplifies its cutting** and the **positioning of the accessories during the installation.**

Pre-assembled construction elements

SF Clix 31

The clix-elements with 90°-rotation enable **a simple and time-saving post-installation in set channels.**

The pre-assembled accessories guarantee a **time-saving and easy installation** due to the reduced number of articles.

The unique thrust block **guarantees a secure installation position.**

MW Clix 90°

Optimised connection elements

FHS Clix

The special spring leg on the clix-elements ensures the required pressure in the channel for **a simple adjustment of the element.**

The unique stop element on the clix-elements **facilitates the precise and error-free 90°-rotation in the channel.**

FSM Clix M

FSM Clix P

The unique and disappearing thrust block on the plastic holder of the sliding nut Clix P guarantees a **connection without plastic insert in order for a secure metallic connection.**

The characteristic retaining brackets on the connector elements guarantee the **form-fitting installation in the channel.**

SV 31

The variable channel system. Flexibility in the system.

Applications.

Channel fastening on the floor

SF Clix 31 Saddle flange

- Time-saving and secure installation with the preassembled SF Clix 31.

Channel construction as bracket

MW 90° Clix Angle bracket

- The unique thrust block on the MW 90° Clix guarantees a secure installation position.

Ventilation duct fastening with suspended channel

FLS light channel, EM31 rubber inlay

- Easy and secure installation through optimum stability of the light channels and acoustic decoupling of the EMS rubber inlay.

Channel extension with rail connector

FSM Clix P Sliding channel nut

- Secure metal connection due to the disappearing thrust block on the sliding nut FSM Clix P.

Rack with two levels

SV 31 Channel connector

- Form-fitting installation longitudinal and transverse to the channel direction due to the characteristic retaining brackets of the channel connector SV 31.

Light, suspended pipe fastening

FSM Clix M Sliding channel nut

- Easy adjustment of the suspension position in the channel with the FSM Clix M through the characteristic spring leg.

Cantilever arm fitted on channel

HK 31 Channel washer

- Flexible and stable channel connection, also on the reverse, as a result of the unique retaining brackets on the channel connectors.

Pipe fastening on light channel

FHS Clix T-head bolt

- Precise and error-free 90° rotation on the clix-elements through the special stop element.

Ventilation pipe fastening to the wall

WS 31/45° Angle brace

- Stable and secure cantilever arm fastening through the angle brace WS 31/45°.

Cable duct on cantilever arm

ALK Cantilever arm

- Easy and load-optimised cantilever arm fastening through various cantilever arms ALK.

Range and loads.

fischer FIXPERIENCE - INSTALL - FIX.

The design and information software suite.

- The modular design program includes engineering software and application modules.
- The software is based on international design standards (ETAG 001 and EC2, such as EC1, EC3 and EC5), including the national application documents. All common force and measurement units are available.
- Incorrect input will be recognized and the software gives tips to get a correct result. This ensures a safe and reliable design every time.
- The graphical display can easily be rotated through 360°, panned, tilted or zoomed as required.
- The 3D display gives a detailed and realistic image.
- The "live update" feature helps to keep the program up to date ensuring you are always working with the latest version.
- Free download and updates at www.fischer.de/fixperience-en

Our service to you.

We are available to you at any time as a reliable partner to offer technical support and advice:

- Our products range from chemical resin systems to steel anchors through to nylon anchors.
- Competence and innovation through own research, development and production.
- Global presence and active sales service in over 100 countries.
- Qualified technical consulting for economical and compliant fastening solutions. Also on-site at the construction site if requested.
- Training sessions, some with accreditation, at your premises or at the fischer ACADEMY.
- Design and construction software for demanding applications.

This is what fischer stands for.
